

STEPTREAD Job Tour / Kaloko Housing, Kona

KALOKO HOUSING, first phase, completed by Isemoto Contracting in Sept 2011.

Stairs used: Precast Concrete Closed-Riser STEPTREADS, by Stepstone Inc.

Color: Cafe Brown. Finish: Hawaiian Texture. Much quieter than wood. Can't rot or burn.

Treads going UP. The bottom tread has a 6-3/4" riser to rest above the ground slab. At top is a Starter Nosing tread, on right, which transitions to landing.

Treads going DOWN. At top is the Starter Nosing, adjustable to landing height. 7-3/4" risers slide behind the treads below, allowing adjustable rise.

Left: LOOKING UNDERNEATH. Galvanized angles are recessed in end and bottom pockets in tread. Angles are attached to stringers before erection, then treads bolted to the angles after stringers up. (Many owners paint out underside to match stringers.)
