

Job TOUR KIHEI RESORT 777 Kihei Rd/Maui

The biggest improvements noticed by the two upstairs owners in each alcove after their STEPTREAD rehab is the upscale appearance, and non-slip safety.

But for the 2 downstairs owners, the response is how much quieter the new concrete stair treads are. "Before, kids running, suitcases banging at 10 PM – all would resonate through their condos off the wood treads. Now we seldom hear our neighbors come and go." "It has made a major quality-of-life difference!"

The contractor is equally enthusiastic about STEPTREADS. "They come already finished, with all galvanized hardware for the recessed fastening system. Nothing to cut, paint, or apply non-skid to. No wastage. Reasonable cost. And the clients love them!"
