

STEPTREAD Job TOUR

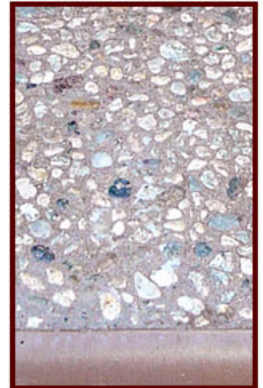

Maalaea Surf • 12 South Kihei Rd., Maui

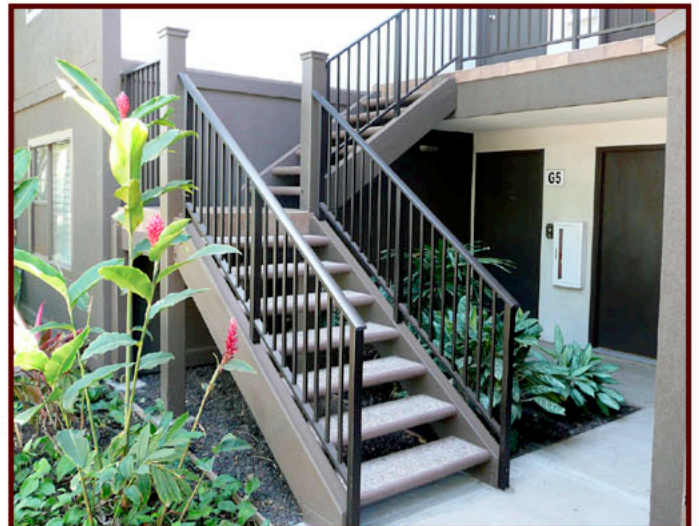

MAALAEA SURF is one of the first condos entering Kihei, right on the ocean. For years they kept covering the wood treads with carpet, which just collected more water and rotted the wood faster. They replaced all treads with STEPTREADS in 2007, along with other major renovations.

A unique feature of these exposed aggregate STEPTREADS was Maalaea's desire for something smoother on bare feet. So STEPSTONE reduced the aggregate exposure, thus being easier on bare feet. "Our homeowners love our new STEPTREADS", according to Pres. of the BOD, Richard Deswinetz. "Stair maintenance is a thing of the past!"

And so was born the first HAWAIIAN TEXTURE Exposed Aggregate.

STEPTREAD SWEETHEARTS, Cidel with Building Systems, and Bonnie, Architectural Rep w/STEPSTONE INC, have spent years helping building managers minimize maintenance and increase owner satisfaction and value.
