-ALLOW $\frac{1}{8}$ " TOLERANCE BETWEEN LANDING PLANKS.

90° LANDING

$\frac{1}{2}$ " = 1'-0"

FILE: STP-0.1-09 ~ Open

Note: for cost savings, LB's and LA's should not exceed 48" in width, which would mean "T" treads should be 44" or less. To effect this, the above example would have 11" deep LB's rather than the 12" shown. For further pricing suggestions, call Bruce at 800 353-0934.
